Ch. 10 Handout 10.7

Areas of Circles and Sectors

Area of a Circle

The area of a circle is the product of π and the square of the radius.

$$A = \pi r^2$$

A **sector of a circle** is a region bounded by an arc of the circle and the two radii to the arc's endpoints. You name a sector using one arc endpoint, The center of the circle, and the other endpoint.

The **area of a sector** is a fractional part of the area of a circle.

Area of a Sector of a Circle

The area of a sector of a circle is the product of the ratio $\frac{\text{measure of the arc}}{360}$ and the area of the circle.

$$\widehat{AOB} = \frac{m\widehat{AB}}{360} \cdot \pi r^2$$

1. A circular archery target has a 2-ft diameter. It is yellow except for a red bull's-eye at the center with a 6-in diameter. Find the area of the yellow region to the nearest whole number.

$$d = 2 \text{ ft} = 24 \text{ in} \quad d = 6 \text{ in}$$

$$\pi r^2 - \pi r^2$$

$$\pi(12)^2 - \pi(3)^2$$
$$144\pi - 9\pi$$

$$A = 135\pi \text{ in}^2$$

$$A \approx 424 \text{ in}^2$$

2. Find the area of sector ACB. Leave your answer in terms of π .

$$A = \frac{CA}{360} \pi r^2$$

$$A = \frac{100}{360} \pi (6)^2$$

$$A = \frac{10}{36} \pi (36)$$

$$A = 10\pi \text{ m}^2$$

3. How much more pizza is in a 14-in diameter pizza than in a 12-in pizza?

$$\pi(7)^2$$

$$49\pi -$$

$$\pi(6)^2$$

$$36\pi = 13\pi \text{ in}^2$$
$$\approx 40.84 \text{ in}^2$$

4. A circle has a diameter of 20 cm. What is the area of a sector by a 208° major arc? Round your answer to the nearest tenth.

$$A = \frac{CA}{360} \pi r^2$$

$$= \frac{208}{360} \pi (10)^2$$

$$= \frac{26}{45} \pi (100)$$

9

$$A = \frac{520\pi}{9} \text{ cm}^2 \approx 181.5 \text{ cm}^2$$

5. Find the area of the shaded region. Round your answer to the nearest tenth.

$$A = \frac{CA}{360} \pi r^2$$

$$= \frac{\cancel{120}}{\cancel{360}^3} \pi (24)^2 -$$

$$= \frac{1}{3} \pi (\cancel{576}^{192}) -$$

$$A = 192\pi - 144\sqrt{3} \text{ ft}^2$$

$$A \approx 353.8 \text{ ft}^2$$

$$A = \frac{1}{2} b h$$

$$= \frac{1}{2} (24\sqrt{3})(12)$$

$$= (12\sqrt{3})(12)$$

6. A circle has a radius of 12 cm. Find the area of the shaded region.

$$A_{sq} = bh$$

$$A_{rect} = bh$$

$$A_{parallelogram} = bh$$

$$A_{rh} = \frac{1}{2}d_1d_2 \text{ or } A = bh$$

$$A_{kite} = \frac{1}{2}d_1d_2$$

$$A_{\triangle} = \frac{1}{2}bh$$

$$A_{\triangle} = \frac{s^2\sqrt{3}}{4}$$

base & height have to be \perp

$$A_{trapezoid} = \frac{1}{2}h(b_1 + b_2)$$

$$A_{\text{Regular Polygon}} = \frac{1}{2}aP$$

$a = \text{apothem}$
 $P = \text{perimeter}$

$$C_{\odot} = 2\pi r$$

$$\text{Arc length} = \frac{CA}{360} (2\pi r)$$

$$A_{\odot} = \pi r^2$$

$$\text{Area of sector} = \frac{CA}{360} \pi r^2$$
